Agenda

Introduction to Refugees on Rails

Students project presentation

Become part of the project

Networking & pizza

Concert (!!)

The Project

Mission

- teach refugees software development skills
- provide them with a network of mentors and professionals
- help them find jobs in the industry

Who are we?

Refugees on Rails Munich
Munich chapter of Refugees on Rails Berlin
more infomation at refugeesonrails.org and
munich.refugeesonrails.org
effort expanding to cities across Germany and Europe

the team
[! insert team picture !]

What's our plan?

help students (refugees) acquire coding skills
so they can find a job in the tech industry

supply more than tech expertise
teach practises & attitude

build a network
of students, volunteers, companies, organizations

ultimately
integrate refugees into the workplace, and into the society

The Course

Program schedule

weekly
live instruction workshops with students and mentors in one space

during the week
students work on their own or in small groups; mentors available remotely

every 3 months
hackathon/demo day

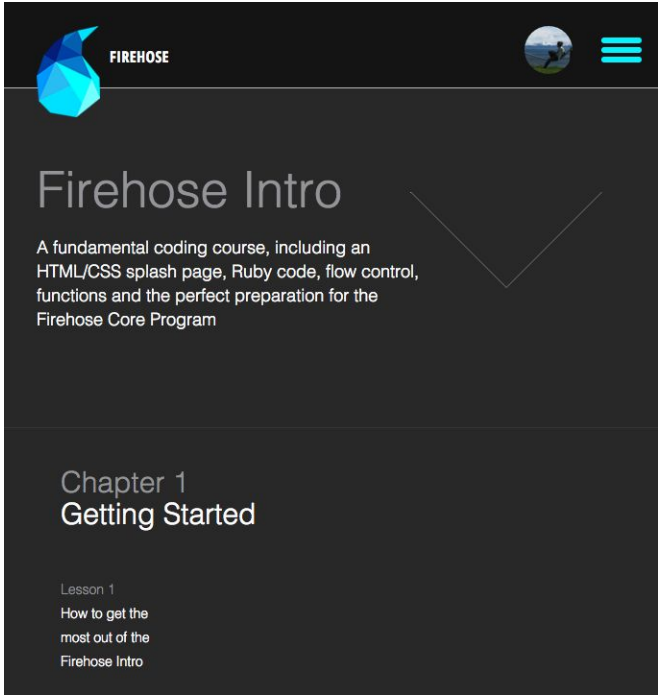
on demand and by availability
tech talks

Curriculum

the FireHose project
15 week world-class coding bootcamp, focusing on real world skills

2 weeks intro/prep: HTML/CSS/ruby basics
13 weeks Ruby on Rails with real applications, algorithms, and TDD

how is it going to be used?
students work at their own pace in groups with the help of the mentors



Volunteers

Ways you can help

Become a volunteer
help students develop their skills; help with organization

Offer a space for teaching
space to set up the course classes and events

Join our supporting network
contacts, introductions, internships

Others
laptop donations

Volunteer Descriptions

Mentor
Teaching /preparing a class, helping students with their final projects, etc

Superhero
General help and support

Other
Photographer, Designer, HR, Social Media Expert, ect

Students

Course requirements

A good English
following the class and being able to communicate

Basic computer skills
write and open e-mails, surf the internet

Interest
motivation to learn

Next steps

Find students for the next workshop in September

Expand network of volunteers

Get more laptop donations
